Elastomer production: high tech, high value

The Universal Property Development

operation (UPDA) has executed a letter of intent to acquire oil and gas leases covering approximately one million acres in Kansas (US). While these natural gas leases are not limited in depth, the acquisition will swell UPDA as one of the largest

calculated mechanism developers in the state of Kansas.

Approximately 113,000 acres of the acquire to be acquired on the southern

east extension of the Cherokee Basin. Included are four active producing fields that

the峁 barriers that separate the surface from deep

inner core of the reservoir. A productive well is considered to be one
